

DATA LOADING & INSPECTION REPORT

AnalystLab Africa – Data Science Internship

Week 1–2 Assignment

1. TITANIC DATASET

Dataset Overview: The Titanic dataset contains passenger information used to analyze survival factors.

Structure: 891 rows, 12 columns.

Missing Values: Age (177), Cabin (687), Embarked (2).

Duplicates: 0

2. HOUSING DATASET

Dataset Overview: Housing data used to analyze property price determinants.

Structure: 545 rows, 13 columns.

Missing Values: None.

Duplicates: 0

3. CONCLUSION

Titanic dataset requires cleaning due to missing values. Housing dataset is clean and ready for analysis.
